What aspects of this course impacted your learning experience the most?

Comments
Parter quizzes because it was a good way to collaborate and bounce off of each other ideas, since it's something that you also do in the real world and work environment.
a good review of the basics of mathematics
none
The content impacted my learning the most. I liked the course.
weekly quizzes helped me absorb the info
The quizzes
Teaching style is easy to learn from. Review for exams is really helpful for me. Teacher also asks us for feedback every class.
The organization of course materials.
unorganized/hard to read notes
Being able to ask hands on questions.
the way the notes were formatted were really helpful, and I liked how we did the packets
Worksheets and explanation of problems to teach lessons.
The way the material was taught was helpful in some ways and not in others.
Being able to work with other students in the class during working through the problems.
Hands on help was good
The review days were beneficial and the time spent in the classs was well used
the quizzes
I really needed to get back into the groove of math so this course helped me a lot.
Professor was rude
The way the professor structured the class in terms of the order we would learn things in had a negative impact on my retention and made it difficult to grasp the lessons. For example, starting and focusing totally on a new unit the same day we are taking a quiz on previous topics.
Definitely the pace at which things were taught was really beneficial to me, I liked that we had time foreach lesson and all the content was covered relatively thoroughly.
Very helpful in the learning experience
Notes from the class.

Not understanding material
interactive in class
it is a small class, so the professor knew me, and the other students.
great professor, cares deeply
N/A
The in person lectures that the class followed along with using provided work packets.
Constant note-taking and practice problems
The teacher he is hard to understand and you do need to ask him to explain it by the full step by step
The amount of days per week we have class definitely made the class easier.
I have always struggled in math classes but this class was foundational for me to gain the basics as i move on in my college career
The way to learn with the worksheets.
The reviews before the quiz were extremely helpful
Going through the worksheets with us but letting us do questions on our own first
repeating similar problems to memorize the material
The study guides and test reviews were very helpful and always engaging!

Re-explaining questions
very nice guy
none
I think there was an understanding/language barrier between students and the instructor. Sometimes when you ask questions, it can be tricky to explain it in a way that he understands because of the language barrier. (I don't think that's a bad thing, but it can be tedious to handle) When you ask questions, sometimes you need to reword it for him to understand. I think some of his explanations were a bit rigid, which can be hard to work with, but overall I did learn from the class and would take a class with this teacher again. I enjoyed the content and the way the class was set up.
his ability to properly solve and demonstrate where students lacked understanding. Helped me understand without feeling dumb.
Very communicative and helpful
Very nice and respectful so it made the class easier. Very good professor.
He was very kind.

Comments
note taking in class and examples
He was understanding if you needed help.
he cares a lot about his students and really wants everyone to succeed. overall there was a positive environment in the class which is helpful to my learning
Reviews before quizzes.
He's not the best at explaining things you don't understand, he'll just repeat what was previously said.
The professor went through each of the problems and explained how to work through the problem in detail.
Always asking if we have question
He cared about the students, the class, and did what he could to help
n/a
This instructor was very thorough in explaining topics during class, he asked questions to ensure that everyone understood what was taught, and gave good preparational advice and help before quizzes and exams.
He was not nice and I had a hard time understanding him
The professor was always willing to offer help and encouraged students to ask questions.
Definitely his willingness to help us! Communicating with him was really easy and I never felt ashamed to ask questions or reach out for extra help.
He was very helpful in the learning experience
He tried to understand what we was not getting in the class.
n/a
He is a good guy but needs to teach a different way it doesn't work.
He was very easy to communicate with
He was patient and would explains multiple times
very caring
N/A
He's very understanding and easy to communicate with when issues arise.
Engaging lectures, working through problems and very well structured overall
His accent
His patience for his students.
Danced around questions making it hard to get a clear concise answer and wasn't the best at explaining things
He was always very helpful
The repetetiveness

Comments
He was always willing to help
him offering to walk through problems you still weren't getting
He was very helpful and truly wanted us to understand what we were learning
